Instructions

1. You may not use any photographs of your essays. (Draft 1 is typed by you.) Peer & Teacher feedback can be .jpeg images.
2. Your writing portfolios must be typed and submitted to the Turnitin assignments on time.
3. Writing Portfolio Part 1: is of Essay 1 with a 1st, 2nd, 3rd, and a final draft.
4. Writing Portfolio Part 2: is of Essay 2-4. You must use the practice essay prompts given in class for the portfolios. You may not use another topic.
5. You must use Times, 12-point font, double spaced. Each essay should begin with your name, essay type, draft #, and a title. (See the next page for an example.)
6. Please see Blackboard for the Grading Policies and Outsourced Writing Policies in detail. In short, If you are caught plagiarizing or using an assisted writing resource that is academically dishonest, you will receive an F on the assignment and perhaps on the course.
7. See the writing portfolio grading rubric on Blackboard for the specific details of how you will be graded on these assignments.

Essay 1

Essay Type: practice- problem and solution essay

Draft: 1

Title: Improving student health at KFUPM

The student health has been threatened by a lot of factors recently, due to the lack of importance the students give to their health they skip meals, eat a lot of junk food, and don't do exercises.

I just paraphrase the sentence and add reasons of why the students' health is threatened.

Recently the students' health has been threatened by a lot of factors, such as the fast-food restaurant, skipping meals, and not doing exercises. This leads to weak performance, so the student grades won't be high. It also leads to students missing a lot of class and can't catch up with the subjects. University students are more likely to have health issues such that they have a lack of sleep, skip meal, and eat a lot of fast food. In order to improve students' health at KFUPM the university should focus on two main things: the students eating habits, and the student's fitness.

University students devoted all their time to study and sometimes don't eat or sleep even, and that is why improving students' health has become a priority.

Improving the student eating habits and urge the students to take the PE classes.

One way to enhance the student health is tracing the student eating habits and try to figure out if there are things need to be changed. Making sure that the students eat three meals every day is essential for their growth and that helps them to stay focused all day. The university should urge the student to eat their breakfast because it's the most important meal on their day and it gives them energy for their lessons. In order to do this the university can sell healthy food at the cafeteria with an affordable price for everyone, or it may be useful to put a breakfast machine in each floor so that the students can eat before their classes. Another thing that is significant is to make sure the students don't eat a lot of unhealthy snacks such as chocolate and chips because they have a lot of sugar and that makes the student lazy and can have an effect with long periods such as they may have diabetes. If the university makes sure that the students have their breakfast and don't eat junk foods that surely will help improving their health.

for a long-term effect, if they don't reduce the amount of sugar they eat every day they may have diabetes.

I add an if condition to make the sentence stronger.

To handle this problem The university should urge the student to eat their breakfast because it's the most important meal on their day and it gives them energy for their lessons.

Another way to develop the students' health is by improving their physical health. KFUPM students have two PE classes every week and that gives them the opportunity to do exercises, but the problem is that many of the students do not take the classes seriously. The university should **urge** the students to take the PE by **showing them the importance of this classes**. The

motivate

best way to do that is giving the students the advantages of the PE classes and making sure that they understand why it is initial for them. If the students attend the PE classes that **will** **improve their physical health** and help to advance their health generally.

Presenting the importance of the classes

Probably will help to improve their physical health.

To conclude, because of the need to advance the students health, the university should

improve **the students' eating habits and fitness**. In particular, selling healthy food in the cafeteria and **making the student attend the PE classes** are two methods to improve the students' health. With more healthier food the student eat and more exercises they do, their health is likely to be stronger, and most importantly, their performance will be better.

The students' routine in eating and display the importance of the PE classes.

Showing the importance of exercise to maintain strong health.

Title: Improving student health at KFUPM

Consequently, the students will not perform well, and their grades will not be high.

I use a synonym for 'this leads to'

The student health has been threatened by a lot of factors recently, due to the lack of importance the students give to their health they skip meals, eat a lot of junk food, and don't do exercises.

This leads to weak performance, so the student grades won't be high. It also leads to students missing a lot of classes and can't catch up with the subjects. University students devoted all their time to study and sometimes don't eat or sleep even, and that is why improving students' health has become a priority. In order to improve students' health at KFUPM the university should focus on two main things: Improving the student eating habits and urge the students to take the PE classes.

Enhancing the students eating patterns is one way to strengthen the students' health at KFUPM.

One way to enhance the student health is tracing the student eating habits and try to figure out if there are things need to be changed. Making sure that the students eat three meals every day

is essential for their growth and that helps them to stay focused all day. To handle this problem

The university should urge the student to eat their breakfast because it's the most important

meal on their day and it gives them energy for their lessons. In order to do this the university

can sell healthy food at the cafeteria with an affordable price for everyone, or it may be useful to put a breakfast machine in each floor so that the students can eat before their classes. Another

thing that is significant is to make sure the students don't eat a lot of unhealthy snacks such as chocolate and chips because they have a lot of sugar and that makes the student unfocused and

for a long-term effect, if they don't reduce the amount of sugar they eat every day they may have diabetes. If the university makes sure that the students have their breakfast and do not eat

junk food that surely will help improving their health.

I will delete this sentence and write another one that shows the habit the students do.

The students' affair

Because it gives them a temporary energy that will not keep them alarmed all the day, and if they do not reduce the amount of sugar that they eat every day they may have diabetes.

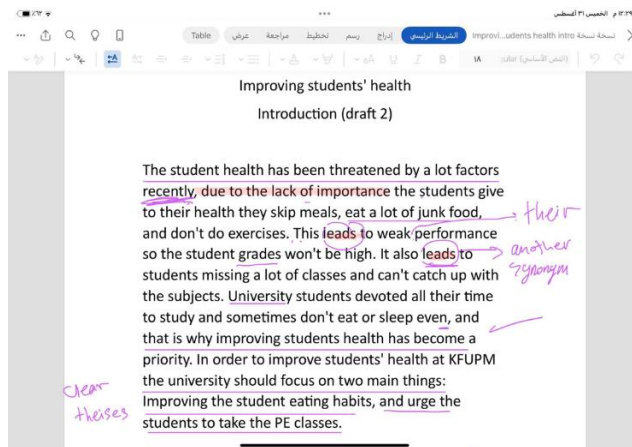

Another way to develop the students' health is by improving their physical health. KFUPM students have two PE classes every week and that gives them the opportunity to do exercises, but the problem is that many of the students do not take the classes seriously. The university should motivate the students to take the PE by presenting the importance of the classes. The best way to do that is giving the students the advantages of the PE classes and making sure that they understand why it is **initial** for them. If the students attend the PE classes, that Probably will help to **improve** their physical health- and help to advance their health generally.

To conclude, because of the need to advance the students health, the university should improve the students' routine in eating and display the importance of the PE classes. In particular, selling healthy food in the cafeteria and showing the importance of doing exercises to maintain strong health, are two methods to improve the students' health. With **more healthier** food the students eat and more exercises they do, their health is likely to be stronger, and most importantly, their performance will be better.

Title: Improving student health at KFUPM

The students' health is often threatened by a lot of factors, usually due to the lack of importance the students give to their own health as they often skip meals, eat a lot of junk food, and do not do enough exercises. University students devoted all their time to study, so they eat a lot of fast food and do not walk or move. This leads to poor physical health, and they may get diseases easily, and that is why improving students' health has become a priority. In order to improve students' health at KFUPM, the university should focus on two main things: increasing students' awareness of the importance of healthy food and making them take the PE classes seriously.

One way to strengthen the student' health is by rising their awareness of the food they should eat. Students do a lot of unhealthy practices such as eating unhealthy food, and this can affect their health negatively. KFUPM student are all measure so they should be able to distinguish between what is good for them and what is bad. To make them confident of what food they need the university should present to the students the advantages of healthy food and how it can improve their health and make them stronger. If the university urge the student to eat healthy food that will advance their health of course.

Improving the student physical health is another way to develop the students' health. KFUPM students have two PE classes every week and that gives them the opportunity to do exercises, but the problem is that many of the students do not take the classes seriously. The university should motivate the students to take the PE by presenting the importance of the classes. The best way to do that is giving the students the advantages of the PE classes and making sure that

they understand why it is initial for them. If the students attend the classes with the knowledge that these classes are improving their health, that probably will help to improve their physical health, and help to advance their health generally.

To conclude, because of the need to advance the students health, the university should Impulse the students to eat healthy food and display the significance of the PE classes. In particular, providing the students with the benefits of the healthy food, and showing them the importance of doing exercises to maintain strong health, are two methods to improve the students' health. With healthier food the students eat and more exercises they do, their health is likely to be stronger, and most importantly, their performance will be better.

Travelling to Riyadh by Train vs Travelling to Riyadh by Plane

University students who are studying in Riyadh are either from Riyadh or from outside the city. Those students who are from outside live at their university campus, and usually every weekend they go back to their homes. The students, therefore, have to choose how will they go. The safer transportation among the students are the train and the plane. To determine which is the best choice for a student living outside Riyadh, two factors will be considered: availability and the cost.

One fundamental aspect to consider when choosing the transportation is the availability on the city. Airports are there in most of the cities, whereas the train stations are not available everywhere in Saudi. The reason for that is that the trains are new transportation at Saudi and there are train stations only at some of the main cities, such as Jeddah and the eastern province. For a student from Jeddah, trains will be a good choice. Conversely, for a student from Abha the plane would be a better choice as it is a mountainous area and there are no trains.

Another key feature students should take into account is the cost. The flight ticket is much more expensive than the train ticket. The flight usually cost around 600SAR depending on the time and airways, however, the train cost around 150SAR. The difference in the prices is due to the service each transportation has. In the plane you have a space to put your bags in, similarly in the train ,and in the plane they may give you food or drinks ,but in the train they may not, so for those who care about the service the train may not be a good choice for them.

To conclude, when choosing between tow transportation, it is important to look at the availability of it and the cost. The plane is significantly more available than the train, that is

because the airport are more than the train station in Saudi, but in the same time the train is cheaper. For a students studying in Riyadh and goes to their family every weekend, the train would be an affordable choice for them if they want to save their money, and for those who can afford the flight, the plane would be better.

Students Overusing of AI

Although the artificial intelligence (AI) has made the people life easier, some students are overusing it. In fact, students can benefit from the AI and use it to develop their skills. For KFUPM students, some of them are using apps such as photo math to solve their homework, or they are using chat gpt in their writing. The university should attempt to reduce the student's reliance on AI before it become more. Two major effects of students overuse of AI at KFUPM are understanding difficulties and considering as cheater.

One significant effect of students overusing the AI is that their understanding in classes decrease. Due to the fact that the homework the teachers give to their students help them to understand the lessons, doing the homework using the AI can greatly affect how well the students perform. Math homework, for example, enable the students to review what they take in class and make them ready for the next lesson, as the lessons in Math are consequence. If the students solve the Math problems using AI, they will have difficulty in understanding the next lessons. For university students, such as KFUPM students, using AI can affect the students marks and their performance in exams, consequently, their total GPA will go down. In other words, KFUPM students who use AI a lot in their homework and studies should be careful that they understand the lessons.

Another major sequence of overusing AI by students is that the student may be considered as a cheater. Given that KFUPM is very strict with making sure the student works are done by the students themselves, the student work may consider as plagiarism. For instance, if the student use writing apps to do the writing tasks the teacher gave, he might be caught and that can lead to marks deduction. Furthermore, the student who are caught using AI may be asked to drop

the course and that will probably make them late in their graduation plan. This means that, the students who are using AI can ruined their plans if they do not decrease their usage of AI.

To conclude, feeling unconfident about their understanding and being treat as cheaters, are two major effects the students at KFUPM may face when completely relay on AI. Doing the work with the use of AI, such as math apps or copying others works, can affect how will the students understand the lessons. Moreover, depending in the AI can make the student consider as a cheater and that could have negative sequences, like cannot complete the course. With less using of AI and more self-work, the students are likely to perform well in the university.

Students Overusing of AI

Although the artificial intelligence (AI) has made the people life easier, some students are overusing it in their studies. In fact, students can benefit from the AI and use it to develop their skills, but they have to use it smartly. For KFUPM students, some of them are using apps such as photo math to solve their homework, or ~~they are using~~ chat gpt to help them in their writing. Therefore, the university should attempt to reduce the student's reliance on AI before it become more. Two major effects of students overuse of AI at KFUPM are understanding difficulties and considering as cheater.

One significant effect of students overusing the AI is that their understanding in classes decrease. Due to the fact that the homework the teachers give to their students help them to understand the lessons better, doing the homework using the AI can greatly affect how well the students perform. Math homework, for example, enable the students to review what they take in class and make them ready for the next lesson, as Math is a consequence subject the lessons in Math are consequence. If the students solve the Math problems using apps, they will have difficulty in understanding the next lessons. For university students, such as KFUPM students, using AI can affect the students marks and their performance in exams, consequently, their total GPA will go down. In other words, KFUPM students who use AI a lot in their homework and studies should be ~~earful~~careful that they understand the lessons.

Another major sequence of ~~overusing students being addicted with~~ -AI ~~by students~~ is that the student may be considered as a cheater. Given that KFUPM is very strict with copying someone work and always want to make sure the students do their work by themselves making sure the

~~student works are done by the students themselves~~, the student work may consider as plagiarism. For instance, if the student use writing apps to do the writing tasks the teacher gave, he might be caught and that can lead to marks deduction. Furthermore, the student who are caught using AI may be asked to drop the course and that will probably make them late in their graduation plan. This means that, the students who are using AI can runed their plans if they do not decrease their usage of AI.

To conclude, feeling unconfident about their understanding and being treat as cheaters, are two major effects the students at KFUPM may face when completely relay on AI. Doing the work with the use of AI, such as math apps or copying others works, can affect how will the students understand the lessons. Moreover, depending in the AI can make the student consider as a cheater and that could have negative sequences, like cannot complete the course. With less using of AI and more self-work, the students are likely to perform well in the university.

Another major sequence of students being addicted with AI is that the student may be considered as a cheater. Given that KFUPM is very strict with copying someone work and

always want to make sure the students do their work by themselves without the help of the internet, the student who uses AI may consider as cheater for taking someone's else work . For instance, if the student use writing apps to do the writing tasks the teacher gave, he might be caught and that can lead to marks deduction. Furthermore, the student who are caught using AI may be asked to drop the course and that will probably make them late in their graduation plan. This implies that, the students who are using AI can runed their plans as they might considered as cheaters if they do not decrease their usage of AI.

To conclude, feeling unconfident about how well they do in lessons and being treat as cheaters, are two major outcomes the students at KFUPM may face when completely relay on AI. Doing the work with the help of AI, such as math apps or copying others works, can affect how will the students understand the lessons. Moreover, depending in the AI can make the student considered as a cheater and that could have negative sequences on them, like they might not be able to complete the course. With less using of AI and more self-work, the students are likely to perform well in the university.

KFUPM Should Increase the Student Stipends

Despite the stipend, the money KFUPM gave to students every month the students get, a lot of them think that it is not enough for them. KFUPM give the student 990 SAR every month and for those who live in the campus it deducts 150 SAR to 250 SAR. Increasing the stipends has become necessary for the students as the costs are increasing. Essentially, being able to buy what they need and decrease the burden the families get are two main reasons of why KFUPM should increase the student stipends.

The student being able to buy all what he need is one convincing reason of why KFUPM should give the student more stipends. Given that all the requirement of university students such as, books, tablets, clothes and transportation, the student need to get more money to buy their needs. For instance, the students who live in the campus, spend a lot of money in flights and transportation and if they do not have enough money they might not be able to go to their family and wait to the next month. Moreover, iPads and tablets have become an essential thing for the student and the cost of them are high depend on the features they have. The student who wants A good feature and large memory will need to pay more. For the student who study from book, the prices of academic books are not cheap, and they may spend all of their stipend in the books. That implies that if the student stipends increased, they will be able to get their needs.

Another major reason of why KFUPM should increase the student stipends is decreasing the expenses burden on families. Due to the fact that student families are supporting the student

with money in the case they do not have enough of it, the families would be less stressful if the student stipends increased. For example, the student living in campus use their stipend to buy foods, books and university requirements, and at the end they do not have enough money to buy ticket to go back to their families. That will make the family pay for the student the flights, which are not cheap every time. and for families with low income that may give the stress and be a heavy burden on them. If the university consider increasing the student stipends that will help their families, especially the families with low income.

Some may argue that the university give a lot of free services to the students such as free wi-fi in the building and ability to take books for free. However, this is not always the case, giving the students the books and the internet will sure save their money but there are also a lot of things the students need to buy. Considering the students who go to their family every weekend, they may need to pay around 800SAR every month which will give them trouble if the university does not change their stipends. Moreover, the university does not allow the students to cook in their room, that mean the students will have to order their food and the restaurants are more expensive than the home-made food. In this way, the student will not be able to buy their needs if the university does not increase their stipends.

To conclude, the ability to purchase what they need and the less burden in the student families are two main reasons of why KFUPM should give the student more money. The university student needs a lot of things which are not very cheap such as electronic devices and books. If the students cannot afford them that will make their family give them more money. However, it is true that the university give the student free access to the wi-fi and books, but the student still need more money. If KFUPM take into account increasing the student stipends, it will help a lot of students and their families.

KFUPM Should Increase the Student Stipends

Although the student gets stipends every month from the university, a lot of them think that it is not enough for them. KFUPM give the student 990 SAR every month and for those who live in the campus it deducts 150 SAR to 250 SAR from it. Increasing the stipends has become necessary for the students as the costs are increasing. Essentially, being able to buy what they need and decreasing the burden the families get are two main reasons of why KFUPM should increase the student stipends.

The student being able to buy all what he need is one convincing reason of why KFUPM should give the student more stipends. Given the requirement of university students such as, books, tablets, clothes and transportation, the student need to get more money to buy their needs. For instance, the students who live in the campus, spend a lot of money in flights and transportation and if they do not have enough money, they might not be able to go to their family and wait until the next month. Moreover, iPads and tablets have become an essential thing for the university student and the cost of them are high depending on the features they have. The student who wants a good feature and large memory will need to pay more. For the student who study from book, the prices of academic books are not cheap, and they may spend all of their stipend in buying the books if they want to keep the book for them. That implies that if the student stipends increased, they will be able to get their needs easily.

Another major reason of why KFUPM should increase the student stipends is decreasing the expenses burden on families. Due to the fact that student families are supporting the student with money in the case they were broken at the end of the month ~~do not have enough of it~~, the families would be less stressful if the student stipends increased. For example, the students

living in campus use their stipend to buy foods, books, and university requirements, and at the end of the month they may not have enough money to buy ticket to go back to their families. That will make the family pay the flights for the students, which are not cheap every time. For some families with low income, they may not be able to buy ticket for the student or maybe they will borrow some money to afford the flight for their student. If the university consider increasing the student stipends that will help their families, especially the families with low income.

Some may argue that the university give a lot of free services to the students such as ~~free-wi-fi in the building and~~ ability to take books for free. However, this is not always the case, giving the students the books ~~and the internet~~ will sure save their money but there are also a lot of things the students need to buy. Considering the students who go to their family every weekend, they may need to pay around 800SAR every month which might give them trouble if the university does not change their stipends. Moreover, the university does not allow the students to cook in their room, which mean the students will have to order their food and the restaurants are more expensive than the home-made food. In this way, even if the university give the student free services the students still need to get more stipends. ~~the student will not be able to buy their needs if the university does not increase their stipends.~~

To conclude, the ability to purchase what they need and the less burden in the student families are two main reasons of why KFUPM should give the student more money. The university student needs a lot of things which are not very cheap such as electronic devices and books. If the students cannot afford them that will make their family buying them or giving their student more money to buy. However, it is true that the university give the student free access to the wi-fi and books, but the student still need more money. If KFUPM take into account increasing the student stipends, it will help a lot of students and their families.

KFUPM Should Increase the Student Stipends

Although the student gets stipends every month from the university, a lot of them think that it is not enough to survive university ~~for them~~. KFUPM give the student 990 SAR every month and for those who live in the campus it deducts 150 SAR to 250 SAR from it. Increasing the stipends has become necessary for the students as the costs of living are increasing. Essentially, being able to buy what they need and increasing the student health ~~decreasing the burden the families get~~ are two main reasons of why KFUPM should increase the student stipends.

~~The student~~ being able to buy all that student need ~~what he need~~ is one convincing reason of why KFUPM should give the student more stipends. Given the requirement of university students such as, books, tablets, clothes, -and transportation, the student need to get more money to buy their needs. For instance, ~~the students who live in the campus, spend a lot of money in flights and transportation and if they do not have enough money, they might not be able to go to their family and wait until the next month. Moreover,~~ iPads and tablets have become an essential thing for the university student and their prices keep getting more expensive not less. ~~the cost of them are high depending on the features they have. The~~So, the student who wants a good feature and large memory will need to pay more. For the student who study from book, the prices of academic books are not cheap though, and they may spend all of their stipend in buying the books if they want to keep the book for them. That implies that if the student stipends increased, they will be able to get their needs easily.

Another major reason of why KFUPM should increase the student stipends is advancing the students mental health ~~decreasing the expenses burden on families~~. Due to the fact that students need to give their selves some free time after studying ~~families are supporting the student with~~

money in the case they were broken at the end of the month, the families would be less stressful if the student stipends increased the lower stipend will not help them to reward their selves. Considering the high pressure the students feel in the exams, it is important that they have enough money to go out and change their mood or they may get some mental health problem. For example, the students living in campus use their stipend to buy foods, books, and university requirements, and at the end of the month they may not have enough money to buy ticket to go back to their families and that could affect their health negatively if they stay away from their family for a long time. That will make the family pay the flights for the students, which are not cheap every time. For some families with low income, they may not be able to buy ticket for the student or maybe they will borrow some money to afford the flight for their student. If the university consider increasing the student stipends that will help the students to take care about their selves their families, and strengthen their mental health especially the families with low income.

Some may argue that the university give a lot of free services to the students such as the ability to take books for free. However, this is not always the case, giving the students the books will sure save their money but the university give the students the book just for one semester and they cannot write on it there are also a lot of things the students need to buy. in the case of students who wants to write notes the university book will not be helpful. For that reason the students used their digital devices and get the pdf copy of the book which is not free most of the time. The average prices of the digital devices the student need is around 6000SR which is equivalent to the stipend of six month. This means that if the university does not increase the stipends the student will not be able to get the source of information they need. Considering the students who go to their family every weekend, they may need to pay around 800SAR every month which might give them trouble if the university does not change their stipends. Moreover, the university does not allow the students to cook in their room, which mean the students will have to order their food and the restaurants are more expensive than the home-

~~made food. In this way, even if the university give the student free services the students still need to get more stipends.~~

To conclude, the ability to purchase what they need and the healthier mental health they have~~less burden in the student families~~ are two main reasons of why KFUPM should give the student more money. The university student needs a lot of things which are not very cheap such as electronic devices and books. Also, not having enough money will prevent the students from going out and buy what they want.~~If the students cannot afford them that will make their family buying them or giving their student more money to buy.~~ However, it is true that the university give the student free access to ~~the wi-fi and~~ books, but the students still need more money. If KFUPM take into account increasing the student stipends, it will help a lot of students ~~and their families.~~
